

Zaima Gull Choudhry

Salesforce Developer | US Citizen | [Portfolio](#) | ZaimaGull@gmail.com | [LinkedIn](#)

SUMMARY

Experienced Salesforce Developer with over 3 years of experience in Agile and Scrum-based cloud environments. Proficient in customizing and optimizing Salesforce solutions using Apex, Lightning Components, and Flow Builder with expertise in Object Oriented Programming (OOP). Showcased a consistent ability to deliver projects on time and within budget by proactively identifying and resolving difficulties, working well with cross-functional teams, and managing numerous tasks simultaneously. Excellent interpersonal and communication skills for fostering the development of long-lasting connections with clients and team members and for productive teamwork.

TECHNICAL SKILLS

Salesforce: **Apex, Lightning Web Components (LWC), Data Migration, Process Builder, Flow, Integration, Visualforce, Triggers, Workbench**

Languages: **JavaScript, HTML, CSS, XML, Apex, Python, MATLAB**

Test Tools: **Postman, REST and SOAP API, Jasmine, IBM SPSS**

Project Management Tool: **Jira, X-ray, Slack, Microsoft Office, Outlook**

Methodologies: **Agile (Scrum), Waterfall, SDLC, MVC**

Database: **SOQL, SOSL, JSON, SQL**

Version Control System: **Git, GitHub**

IDEs: **Visual Studio Code**

PROFESSIONAL EXPERIENCE

TalenTech

Remote

Technical Team Collaboration, Salesforce Developer

3/23 - 4/25

- Led a group of 4 Salesforce developers through the full software development lifecycle using Agile methodologies and Jira to manage sprint planning, user stories, and task allocation.
- Designed an interactive map using Lightning Web Components (LWC) and Lightning Message Service (LMS), allowing managers to visualize Sales Agent location data; boosted decision-making efficiency for over 500 daily users.

Novus Banking, Salesforce Developer

10/22 - 3/23

- Created custom Lightning Web Components to support FD Details and Applicant Details objects, streamlining investment tracking workflows and enabling management of over 5,000 static records through the Interest Scheme master object.
- Drove the automation of a Salesforce Fixed Deposit application, resulting in a reduction in data entry errors.

New Agora, Salesforce Developer

1/22 - 10/22

- Spearheaded the build of specialized Lightning Web Components (LWC) for the New Agora Salesforce platform, enhancing Account and Contact record transfers, and improving data validation.
- Developed an application within Salesforce to manage 500 centers while creating 100 user accounts for the asset, finance, leasing, marketing, and support teams.

TPE Logistics, Salesforce Administrator

9/21 - 1/22

- Created customized page layouts for TPE Order objects based on record types (Sea, Air, and Land), ensuring only relevant custom fields were displayed per transport type to reduce data entry errors and improve form accuracy.
- Implemented multiple validation rules including logic for Approval Date, Approval Order, Transport Start Date, and Transport Type, ensuring fields were completed correctly (e.g., enforcing approval within the first 15 days of the month and validating payment fields to be completed).

Dana Farber Cancer Institute

Boston, MA

Research Assistant - Psychosocial Oncology & Palliative Care

2/20 - 9/21

- Extracted and validated over 1,000 data entries from Epic, enriching the psychosocial oncology database with missing information and enhancing data integrity for comprehensive analysis on SPSS.
- Prepared detailed documentation for four internal audits annually, ensuring 100% compliance with regulatory standards and facilitating smooth communication with the Institutional Review Board (IRB) on submissions.

Brigham & Women's Hospital

Boston, MA

Research Coordinator - Radiation Oncology

6/19 - 9/19

- Coordinated and administered over 20 neurocognitive tests to patients with central nervous system disorders, gathering crucial data that informed personalized radiation therapy treatment planning and improved patient outcomes.
- Navigated complex regulatory landscape by preparing and submitting 3 continued review submissions, amendments, and annual reviews to hospital oversight committees, ensuring adherence to research protocols.

RELEVANT PROJECTS

Amazon Homepage Replication

8/24 - 4/25

- Designed and developed the project to demonstrate front-end development skills, including HTML, CSS, and JavaScript.
- Developed Model-View-Controller (MVC) architecture to structure a dynamic e-commerce website and implemented Jasmine unit testing to validate JavaScript functionality, ensuring UI behavior and reliable code performance.

Crinkle Cookie

1/25

- Pioneered project as a mock internship front-end development project to showcase UI/UX proficiency, applying HTML, CSS, and JavaScript to build a responsive, user-centered website.
- Designed and implemented a cohesive brand identity through strategic use of color palettes, typography, and imagery, elevating the site's visual appeal and improving user experience.
