RELEVANT PROJECTS

SDLC Technical Team Collaboration — Remote
Salesforce Admin and Developer — *March 2025 - Present*
- Participate in Agile methodology and SCRUM processes such as Sprint Planning, Backlog grooming, Daily Standups, and Retrospectives.
- Utilized Jira to collaborate with a team of 5 admin and developers to answer 32 user stories.

Novus Banking — Remote
Salesforce Admin and Developer — *February 2025 - March 2025*
- Engineered an automated application for an American multinational financial service company to track branches and process fixed deposit applications, utilizing a data import wizard to import 5,000(180) static data entries into the Interest Scheme object for data management.
- Utilized VS Code to create Apex classes and LWC to fetch interest scheme IDs from the database.

New Agora — Remote
Salesforce Admin and Developer — *December 2024 - February 2025*
- Built an application within Salesforce for a Real Estate Agency called, 'New Agora' to manage 500 centers while creating 100 user accounts for asset, finance, leasing, marketing, and support teams.
- Incorporated LWC to deploy customized frameworks utilizing HTML, CSS, XML, and JavaScript.

Crinkle Cookie — Remote
JavaScript Developer — *January 2025*
- Developed an interactive form using HTML, CSS, and JavaScript to enhance user experience where validation was made for the name, address, and phone number fields required before submission.
- Integrated checkboxes for users to select cookie and drink options, providing order flexibility, and radio buttons were included for hot or cold drink preferences, ensuring a seamless selection process.

TPE Logistics — Remote
Salesforce Admin and Developer — *August 2024 - December 2024*
- Created approval processes, validation rules, and flows to automate workflow where new finance team users are auto-assigned to the permission set permitting CRED access to the contract object.
- Developed LWC to deploy triggers to link FD records to the proper user for security purposes.

WORK EXPERIENCE

Tiny Tots — Winchester, MA
Manager — *May 2023 - August 2024*
- Managed operations, developed stronger curriculums leveraging teaching experience, and facilitated hiring staff training, enhancing team cohesiveness.
- Analyzed monthly expenses, payroll, and revenue generation upgrading policy contracts, which boosted sales by 33%.

Teacher — *September 2021 - May 2023*
- Instructed individualized support to children while maintaining a safe, nurturing, and encouraging environment in an educational setting.
- Built educational games and activities to enhance key early child development skills such as fine motor control and language development.

Life For Relief & Development — Boston, MA
Community Relations Associate — *September 2021 - January 2022*
- Implemented target outreach campaigns that successfully increased donation funds by 30% to $13,000 in the first quarter of operation.
- Executed a comprehensive training program on humanitarian relief methods for associates across the organization, resulting in a 30% increase in adoption rates and an improved model.

Dana Farber Cancer Institute — Boston, MA
Data Analyst - Psychosocial Oncology & Palliative Care — *February 2020 - September 2021*
- Analyzed operational workflows within the operations teams to identify areas for enhancement, resulting in a 15% increase in productivity and efficiency metrics.
- Partnered with BWH Neurology Department to understand challenges and align data, leading to a 20% increase in meeting project goals, and objectives, resulting in a research paper.

Brigham & Women's Hospital — Boston, MA
Data Analyst - Radiation Oncology — *June 2019 - September 2019*
- Collaborated with a biostatistician to integrate approaches enabling closed-loop discovery cycles, leading to a 15% improvement in the efficiency of research processes.
- Coordinated cross-functional meetings with research and clinical teams to develop a comprehensive strategy for integrating central nervous system factors and biomarkers into upcoming clinical trials, resulting in a 30% increase in trial efficiency.
